THALES ALENIA SPACE

5 ALLEE DES GABIANS, 06150 CANNES

Dear Sir or Madam,

Currently in my first year in Digital Sciences at ENSEEIHT Toulouse, I am looking for a worker internship this summer in your company. I will be able, in fact, to develop a know-how which will be very useful for me to carry out my student project, namely to be hired in a flagship company and why not within the Thales group, once my engineering degree is obtained.

Thales Alenia Space is the best company in the Mediterranean area in the aerospace field, and Thales Group is today a master in new technologies and I hope to be able to contribute to its development so that it remains a leading company in these fields. The different business sectors in which you operate, as well as the group's international reputation are some of the reasons why I am applying for a work placement with you.

The transition to your company will enrich my working capacity by allowing me to observe positions of high responsibility, develop my professionalism and improve my vision of the world of space engineering. Being part of Thales will allow me to start forging the "hard skills" necessary for an engineer, and to integrate myself professionally in better conditions.

My visit to the company in Terminale S made me understand that nothing was left to chance in your premises and that thoroughness and passion were essential to exercise a professional activity at Thales. I am convinced that doing a work placement with you could increase my intention to work with you very soon.

My adaptability will allow me to respond to the diverse and varied requests of my superiors but above all to maintain friendly and constructive relationships with my future colleagues within the structure. Finally, my organizational skills will be useful for the proper functioning of the position for which I will assume all responsibilities.

Pending a favourable response, please accept, Madam, Sir, the expression of my best feelings.

Thomas SADURNI
